

**INVITE YOU TO
VISIT the SHED**

On The Beach Promenade

The former Beach Pavilion is our Shed. Leased from the Council we have refurbished it as a community asset then customised it to create a facility for citizens of the area to enjoy the company of others while relaxing or being involved in Shed or community projects or their hobbies.

Our Workshop

Everything from workbenches with vices and hand tools through to woodworking and metal forming machines is available

A fully equipped machine shop is available to all Sheddors who sign up to use the workshop. These include

- Lathes
- Band Saws
- Bench Saws
- Planer/thicknesser
- Pillar drills

Health and Safety

A safety manual is in place and every new Sheddor is given a Welcome Pack which details the critical features and processes of the safety regime. Each Sheddor is given instruction on each piece of machinery and their new competence recorded.

Dust control and air purifying sets ensure a safe working environment.

Supervisors are trained in first aid, CPR and the defibrator in the Shed.

Our Equipment
